Background

Working in conservation management since 1990, Legacy Habitat Management Ltd (LHM) and its Directors, Matthew Dixon and Ian Henderson, have built up a reputation for quality of work and punctuality of service, whilst maintaining high standards in health, safety and environmental practice. LHM has a depth of experience in the management of employees and sub-contractors on ecologically sensitive sites and prides itself on the success of these contracts. Legacy Habitat Management has also sub-contracted the use of helicopters for bracken spraying as part of a rolling programme of bracken management, for English Nature in the Peak District.

Matt Dixon BA, Managing Director.

Matt comes from an organic farming background and is the brainchild behind Legacy Habitat Management which he set up 19 years ago to provide practical environmental solutions for bodies such as English Nature and the Peak District National Park Authority. He now has a vast experience covering a wide range of practical environmental solutions, operating a team providing quality work with particular focus on the environmental issues involved. He has overall responsibility for health and safety within the company.

Key Experience

Key Experience at Legacy over the last ten years includes;

- Overseeing and implementation of ISO 9001
- Health and Safety Management in an increasingly rigorous market.
- Product and equipment development for the mitigation and wildlife sector
- Diversification within the company to include online sales (www.wildlifefencing.co.uk)
- Project Management on large scale civil projects (Thames Gateway, gas pipelines, power stations)
- Close association with ecological consultants delivering mitigation to clients

Project Experience

6ha vegetation management and GCN exclusion at Cottam Power Station

GCN exclusion works associated with Sherringham Shoal offshore wind farm.

Supply and installation of various wildlife fencing systems to **EDF Energy and CCGT** at Cottam & West Burton Power Stations and on the gas pipeline route. Rigorous and extensive Health and Safety compliance and supply procedures.

Thames Gateway Project – 30km of great crested newt, reptile and water vole fencing systems supplied and installed at Shell Haven. Ongoing commitment to a further 75km of fencing system at the site and associated mitigation works.

Birse - Supply and installation of GCN wildlife fencing system to P&H pipelines in Longridge, Lancs.

Laing O'Rourke - 50km newt fencing and stock fencing along Marsh Gibbon gas pipeline route. 20 staff including 14 casual labourers. Five machine operators with drivers from three to twenty tonnes. EUSR Pipeline compliance.

Kent County Council – 21ha rhododendron removal and disposal contract from SSSI woodland. Two twenty tonne excavators and forest forwarder in Shornewood Country Park. Public access not restricted for duration of contract.

Jackson Civil Engineering – 10km newt fencing contract along verge and hard shoulder of M3 motorway. Ten staff, three machines. Motorway compliance.

United Utilities – 10km newt fencing contract along water pipeline. Pipeline compliance.
