

ENVIRONMENTAL POLICY

Baker Consultants Ltd fully recognises the potential effects that its business operation can have on the environment. To minimise these risks, the company has set out the following policy aims to guide its work.

Baker Consultants Ltd will endeavour to:

- Maintain the ecological processes and life support systems essential for a fully functional biosphere.
- Further wherever possible the conservation and enhancement of biodiversity through environmentally sustainable management and development.
- Develop human understanding, capabilities and collaboration to conserve global resources.

To deliver these broad aims, Baker Consultants Ltd will:

- Implement and maintain an Environmental Management System that is independently certified as compliant with ISO 14001:2015
- Comply with all relevant environmental legislation and approved codes of practice, co-operating fully with the regulatory authorities.
- Assess the environmental aspects of its operation, with a view to reducing and controlling environmental impact.
- Aim to minimise resource and energy usage, for example making use of appropriate energy-saving technologies and recycled products.
- Aim to make full use of sustainable transport methods, using public transport, cycling and walking wherever practicable.
- Aim to offset CO₂ on passenger flights
- Aim to prevent pollution through correct disposal of waste and advice given to clients by our consultants.
- Educate and advise clients and colleagues on general environmental issues as part of its normal project work.
- Train its employees in good environmental protection practices and encourage employee involvement in environmental improvement initiatives.
- Continually monitor the environmental impact of its business activities

This environmental policy will be reviewed and updated on a regular basis, to remain in line with new knowledge and the development of best practice.
